

Physicians Choice Management Paris Dialysis Center - Paris, Texas

Hayter Engineering worked with Cherry McNab Architects, LLC for a new Dialysis Center in Paris, Texas. This is an 11,000 SF facility that is the largest of its kind because it incorporates doctors offices on one half and the dialysis clinic on the other half.

All landscaping beds have sprinkler systems and up-lighting for the building, rear handicap entrance and all utilities, detention pond and site drainage, and a unique drainage channel to accommodate the parking lot being higher than the building finished floor - this new channel provides an excellent location for the downspouts to drain into, and the 6" high curb in the parking lot protects flows accumulated in the parking lot to ever reach the foundation.

Services provided by Hayter Engineering are listed to the right.

This project was completed in 2012.
