

## Mims Creek Wastewater Treatment Plant Aerator Replacement City of Fairfield, Texas

The aeration equipment at the wastewater treatment plant was mechanically unreliable and was required to be replaced.

Four (4) 2200 S.S. Series Coupling Drive Aerators and a control panel, associated power and control wiring were installed.

The top photo shows one of the S&N floating aerators at rest. The photos below show the aerator in operation.

Necessary training was also provided for the operators at the wastewater treatment plant.

Services provided by Hayter Engineering are listed at right.

This project was completed in 2016.
