

**Texas Department of Agriculture / Texas Capital Fund Grant, Downtown Sidewalk Replacement
Clarksville Street, City of Paris, Texas
Project ID: 710222**

This sidewalk grant was obtained to enhance public infrastructure and stimulate economic development along Clarksville Street in Historic Downtown Paris.

Improvements included 6,385 SF of new sidewalk with curbs, curb ramps, asphalt pavement repair, and 7 classic acorn style street lights which have adorned metropolitan avenues and town streets for nearly a century. These sidewalks and lights are the third phase of streetscape improvements designed by Hayter Engineering for the City since 2006. Careful coordination between the consultant and the Main Street Manager resulted in a cohesive uniform appearance.

Services provided by Hayter Engineering are listed at right.

This project was completed in 2012.
