

## Kimberly - Clark Corporation Paris, Texas

Hayter Engineering designed a truck parking area approximately 500' x 500' for 195 vehicles south of the Kimberly-Clark Corporation building in 2006.

This project included topographic surveys and mapping for Kimberly-Clark. In addition, Hayter Engineering provided design and drawings for their warehouse expansion in 2007.

The work included: 1) review of site utilities and survey to locate building corners and loading dock elevations; 2) water and sewer design including relocation of fire lines, service to the new 6500 SF office area and restroom in the new warehouse; 3) facilities for the disposal of the roof drain water and drainage design; 4) perimeter road design; and 5) electrical grounding grid design. Logistics office parking and a loop road was also completed.
